Tuesday, Oct. 6.

There was a falling off of nearly 100 % cent, in the transactions on the Stock Exchange to-day as compared with those of yesterday. The challenge were but slightly in excess of 100,000 shares, and it is hardly necessary to add that Board-room traders and small professional on.

Board-room traders and small professional on.

252,302 Board-room traders and small professional operators were responsible for practically all of them. The determination of the managers of the campaign against repudiation and revolution to make an unusually aggressive fight between now and election day is, for ob vious di sons, well known to every sub-tantilion terest. It is being impressed bon taem, as well as upon political workers, that no servery as the servery subworkers, that no effort must be spared to compass the defeat of the advocates of unsound Confidence in the result of the election

has not been impaired, but, as previously noted | Company reports for the year ending June 30: in this column, every one who possesses or con-trols capital, whether the amount be large or small, is beginning to realize the gravity of the issue, and is therefore reluctant to take new risks until it is decided. This being the case, the chances are that the stock market for some little time to come will be seft in the hands of those who endeavor to follow its fluctuations for a livelihood.

The only circumstance offsetting the dulness of to-day's market was the continued weakness in foreign exchange, which, however, seemed to have very little effect. In the early dealings the professional element was inclined to switch over to the long side of the market, but it soon abandoned that position, and in consequence the list, with the exception of American Tobacco and a few inactive stocks, notably Hocking Valley and United States Leather preferred, closed fractionally lower than vesterday. The only noteworthy net decline was that of 114 \$2 cent, in Manhattan Railway. As that stock had advanced sharply curing the last few days, in the face of a sluggish and irregular market, the reaction in it would seem to be amply explained by that fact. Foreign arbitrage houses sold a few stocks on balance, probably about 10,000 or 12,000 shares. The final move ment of prices was influenced to an extent by a sharp flurry in the call money market that car ried rates up to 12 P cent. A plausible explanation of this unexpected movement in call money was that many of the banks that usually supply the needs of belated borrowers on call were practically out of the market this afternoon on account of the protracted annual meeting of the Clearing House Association, which

Currency transfers to the interior through the Sub-Treasury to-day were \$275,000, of which ell but \$25,000 was to New Orleans. Boston advices are that none of the \$995,000 gold received there from Europe yesterday will be de-posited in the local Sub-Treasury. The belief is gaining ground that the increased firmness of the money market during the last few days is due not alone to the effect upon banks and other lenders of money of the renewed withdrawais of gold from this centre apparently by those who are constrained to hoard it, but also to the withholding from circulation in various ways o a part of the gold that has been received from abroad. This could be done by not presenting for payment Assay Office checks received for gold deposited with that office and also by holding Sub-Treasury receipts for gold coin deposited with it for examination. A motive for the adoption of such policy can readily be found in the effect of the rates for money upon the foreign exchange market Sight sterling is now down very nearly to the rates at which heavy imports of gold were made during the last six weeks, and foreign bankers who were foremost in that movement are of the opinion that imports of specie upon a moderate scale are likely to be resumed in the near future. Cable advices from London are that gold bullion is in good demand there for Austria, and that the open market price has advanced another farthing, to 77s, 1116d.

A further advance in the price of wheat, resulting chiefly from an active foreign demand, was the feature of to-day's commercial markets. particularly as it was accompanied by reports that inquiries are being made, both here and in Liverpool, for grain berth room from this port to India. In confirmation of these reports it can be stated that one of the largest grain exporting houses received from its Liverpool correspondent to-day, in reply to an inquiry regarding the probability of shipments of American wheat to India, a cable stating that the firm addressed sold yesterday to the Continent two cargoes of American wheat, with a provision In the contracts that the charters might extend to Bombay at the purchaser's option. This inrealize that it may be necessary for India, which a few years ago lowered the price of wheat by its enormous yield of that cereal, to see, but lost part of this and closed 3c. higher. Fucall upon the United States for subsistence.

Money on call, 405 \$\mathbb{V}\$ cent., with exceptional transactions as high as 12 \$\mathbb{V}\$ cent. Time money, 6 \$\mathbb{V}\$ cent, for all periods on good mixed Stock Exchange collateral, but there is very little doing. Commercial paper is quoted at 7 \$\mathbb{V}\$ cent. for prime endorsed bills receivable, \$30 \$\mathbb{V}\$ cent. for best single names, and 10 \$\mathbb{V}\$ cent. for other good grades.

Sterling exchange was again weak and lower owing to a limited demand and a liberal supply of commercial bills. Long sterling was also affected by the hardening tendency of private discount at London. Continental exchange was dull and weak. Posted asking rates for sterling, 34.825 for iong bills and \$4.85 for demand.
